In many introductory level courses today, teachers are challenged with the task of fitting in all of the core concepts of the course in a limited period of time. The Introductory Statistics teacher is no stranger to this challenge. To add to the difficulty, many textbooks contain an overabundance of material, which not only results in the need for further streamlining, but also in intimidated ...

Introductory Statistics - Open Textbook Library
The mean score of a group of 20 students is 65. Two other students whose scores are 89 and 85 were added to the group. What is the new mean of the group of students? Solution: The formula: can rewritten as: Total score = Mean × Number of students . Total score of the original group = 65 × 20 = 1,300 . Total score of the new group

Statistics: Mean (solutions, examples, videos)
At Boston University undergraduates can pursue studies in statistics, through degree programs in the Department of Mathematics and Statistics, in a number of ways... If your main interest is in another field, but you know that statistical skills will be key to making a real impact in that field, then a minor in mathematics, with specialization in statistics, may make most sense.
