Evolutionary Theory In Anthropology Providing Ultimate

Introduction. Evolutionary theory is often distinguished from the fact of the historical, genealogical relationships among species. There have been various theories proposed to explain different aspects of those relationships. Some have stood up poorly (such as the idea that an organism recapitulates its evolutionary history as an embryo).

Evolutionary Theory - Anthropology - Oxford Bibliographies

Evolutionary anthropology is the interdisciplinary study of the evolution of human physiology and human behaviour and the relation between hominids and non-hominid primates. Evolutionary anthropology is based in natural science and social science. Various fields and disciplines of evolutionary anthropology are: Human evolution and anthropogeny.

Evolutionary anthropology - Wikipedia

Anthropology and Evolution This article first outlines the various models of evolution that have been proposed, including the Darwinian theory and the most popular alternatives. It then outlines the early development of ideas about how life could have developed, including the Lamarckian theory of the inheritance of acquired characteristics.
